

MESSAGE FROM THE PRESIDENT/CEO

PSA Constructors, Inc. has been fortunate to participate in some unique and significant projects over the past fifteen years including Prime Sub role with URS on the City of Phoenix Arizona Ten Years Capital Improvement Program (CIP) on Sky Harbor International Airport, Goodyear, Deer Valley Airports, and on-going PM Services at the Orlando International Airport on various improvement programs. PSA is a prime consultant providing PM/CM Services for the New High School, and Temporary Facility for Saint Mary's Academy of the Holy Family, and similar service for The Pre-School Learning Center, New Orleans, LA. Long term associate partnership with Turner Construction Company for CM services for twelve schools (elementary, middle, and high) for the Orange County School Board and the renovation of the 1927 Orange County Courthouse clearly solidify our ability to deliver. It is noteworthy that PSA was selected as prime consultant and provided PM/CM Services for the City of Rivera Beach Community Redevelopment effort, and PSA was involved as an associate partner to CHM2 HILL on the Master Plan scope of services for the Port of Palm Beach, Florida.

The diversity of our capabilities expands across educational, transportation, industrial and commercial facilities such as Prime Construction Manager for Vista Lakes Elementary School for the Orange County Public School Board, new elementary schools (Elbert and Snively) for the Polk County School Board. PM Services for Orange County Public School Board on eight schools involving elementary, middle and high schools with URS and Parsons Brinckerhoff.

PSA associate partnership with ZHA for PM and Inspection Services for the Orlando International Airport Northeast Terminal Landside Improvements, and our investment in project management software yielded opportunities to provide Project Control Services on the DFW International Airport CIP (new Terminal "D", and APM) and Houston Intercontinental Airport Capital Improvement Program (CIP) with HKS and KBR solidified our experience in aviation sector. Project Control Services on the General Motor Technical Center Facility with Parsons Brinckerhoff in Warren Michigan and the beautiful Lake Highland Water Treatment Plant, Orlando Florida with Jacobs was a true testimony of our ability to provide quality service.

Finally, it is with much gratitude that I acknowledge those owners and majority partners that placed enough confidence in our firm to allow us to perform and thereby grow.

Fifteen years ago our company began with only one employee. Today, we have over twenty full-time employees working on projects that will directly and indirectly affect the lives of many people in Arizona, Florida, Louisiana, Texas and beyond.

Please peruse our information to learn more about us.
